

CUSTOM DEVELOPMENTS

Cegelec Défense Solutions & Services aims to propose solutions tailored to the specific needs of our customers while respecting all the constraints related to operational theatres or deployment sites.

Design of tailor-made solutions

Cegelec Défense Solutions & Services masters all the contextual elements and constraints related to designing military equipment. Privileged partner for your projects in the field of nuclear, biological, EMC and EMP protection and the reinforcement of specific systems for mobile use, the company works hand in hand with its customers from the pre-project phase to the actual production of the systems, including maintenance in operational condition and integrated logistic support.

Thus we:

- ✓ Analyse requirements,
- ✓ Prepare technical justification report,
- ✓ Design a custom-made structure,
- ✓ Integrate systems and processes,
- ✓ Assume project management and planning.

Study and production requirements suitable tools

Equipped with all the requisite tools, ranging from computer-aided design (CAD) to the finite element calculation module, we conduct products development so as to optimise each system in the following areas:

- ✓ Thermal insulation,
- ✓ Vibration,
- ✓ Mechanical resistance,
- ✓ Electrical engineering,
- ✓ HVAC engineering.

All these tools enable Cegelec Défense Solutions & Services to produce the technical specification files meeting our customers stringent requirements.

Design office quality

Regularly audited by AFAQ or AFNOR during annual follow-up audits or for ISO 9001, ISO 14001 and OHSAS 18001 certifications, Cegelec Défense is acknowledged for the professionalism and the quality of the work produced by its design office.

System qualification

Certified by AFAQ; the overall organisation allows during system development, to undergo state certified qualifications and to demonstrate that our systems comply with the requirements initially expressed, on a step-by step basis.
